
Frozen VLA
Attention-grounded target
Contact-aware geometry
Constrained refinement
instruction, state
VLA (frozen)
prefix features
attention
Sub-task probe
depth, 3 views
Multi-view lifting
Seed growth + candidate filtering
Target confirmation
Boundary-preserving extent
3D target extent (pending)
TSDF → ESDF (cuRobo)
Target-free field
Grasp state → attached object
Link-specific allowed collision
field slice
per chunk
action chunk
Executed-horizon SQP
$d(x) - r \geq m$
Post-check
execute or hold
