T97 hand-layer replay criteria (T97 task 2.2, pre-fixed) and per-run remaining target voxels

T97 2.2 criterion (pre-fixed)	P0m hand layer (baseline)	P0m + crease cut + protrusion + hand freeze 80 mm	Difference	Met

Split by verifier = all runs except REG211 (definitions_verifier.json, fixed before computing). Note: REG954 also has 43 touching (gap < 5 mm) pre-grasp requests in the T97 region set.

Lead judgment: D32 (lists REG119, OCC122, HUR119, HUR850 run medians as separated-scene evidence).
